PROFILE

Full-stack developer skilled in building scalable web applications, real-time systems, and AI-integrated platforms. Strong foundation in data structures and problem solving, with hands-on experience developing production-ready APIs, collaborative tools, and cloud-based media pipelines using modern web technologies.

EDUCATION

Vignan's Institute of Information Technology (VIIT)

2023 – 2027

B.Tech in Computer Science | **CGPA: 8.3**

EXPERIENCE

Full-Stack Developer Intern — Velocitix AI

Jun 2025 – Aug 2025

- Built and enhanced an AI-driven career guidance platform with role-based dashboards using MERN stack and Flask.
- Integrated speech-to-text transcription, LLM-based evaluation, and automated interview workflows.
- Improved backend architecture, API performance, and real-time notification systems for scalable deployment.

PROJECTS

ProedXAI — AI-Driven Career Readiness Platform

[Live](#) | [GitHub](#)

- Engineered a full-stack AI platform (MERN + Flask) for adaptive mock interviews, career assessment, and course recommendations.
- Built a dynamic AI interview engine generating real-time questions using LLM APIs, with automated transcript analysis and structured scoring.
- Implemented computer vision-based cheating detection using OpenCV and MediaPipe (eye tracking, face presence, multi-face detection).
- Designed role-based dashboards with analytics, notifications, and real-time updates.
- Optimized AI deployment under **cloud memory constraints** using lazy-loading and singleton model caching.

Converge — Real-Time Collaboration Platform

[Live](#) | [GitHub](#)

- Built a full-stack real-time collaboration platform using **React, Node.js, Express, MongoDB, and WebSockets (Socket.IO)**.
- Implemented live document sync, typing indicators, role-based access control, and session reconnection handling.
- Designed scalable session-based architecture and tested with **10+ concurrent users** for low-latency performance.

Retail-Ease — Retail Management Backend

[GitHub](#)

- Implemented backend services for billing, inventory tracking, expiry alerts, and discount rules.
- Reduced manual stock monitoring effort by approximately **30%**.

Study-Crew — Collaborative Study Platform

[Live](#) | [GitHub](#)

- Collaborated in a 4-member team to build goal-based study groups with dashboards and leaderboards.
- Implemented real-time chat and progress tracking, improving engagement by **30%**.

Personal Portfolio Website

[Live](#)

- Responsive portfolio showcasing projects and technical skills (React, Tailwind, Framer Motion).

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, Java, SQL

Frontend: React, Vite, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, Flask, FastAPI, REST APIs

Databases: MongoDB, MySQL, Firebase

AI/ML: LLM Integration (Gemini), Speech-to-Text (Whisper), Computer Vision (OpenCV, MediaPipe)

Real-Time Systems: WebSockets, Socket.IO

DevOps/Cloud: Render, Vercel, MongoDB Atlas, Cloudinary, Git

Concepts: DSA, OOP, RBAC, JWT Authentication, System Design Basics
